EDUCATION

Drexel University, Pennoni Honors College

Philadelphia, PA

Bachelor of Science in Computing Security and Technology

Anticipated Graduation: Jun 2027

Concentration: Computing Security

WORK EXPERIENCE

Drexel University - College of Computing and Informatics

Philadelphia, PA

Student Assistant and Support Manager

Aug 2024 - Present

- Troubleshoot hardware, software, and network issues for students and faculty, minimizing downtime and disruption
- Execute imaging and post-deployment setup of student and faculty devices
- Oversaw Bash Script implementation to automate transferring files older than six months to external drives
- Design and deploy Power Automate workflows to streamline repetitive tasks, reducing manual workload
- Perform hands-on maintenance of desktop and laptop hardware, including cleaning, part replacement, and internal component diagnostics to enhance system performance

PECO

Philadelphia, PA

Application Support Analyst

Sep 2023 - Mar 2024

- Provided first-level technical support to mobile workforce teams, including troubleshooting device connectivity issues, resolving application errors, and escalating complex problems to higher-level support as needed
- Supported enterprise Geographic Information Systems and other critical software platforms by ensuring data accuracy, managing user access, and performing routine maintenance to prevent system downtime
- Managed personnel maintenance such as user onboarding, offboarding, and role-based access control updates
- Monitored phishing and ransomware threats and completed cybersecurity training, reinforcing secure practices and compliance with corporate security standards

PROJECT EXPERIENCE

Weather Planner

Frontend Developer

Apr 2024 - Jun 2024

- Developed responsive weather scheduling web application with focus on human-centered design
- Created wireframes and interactive prototypes in Figma to guide development and gather user feedback
- Conducted usability testing and implemented feedback to enhance user experience and interface design

TrackIt!

Frontend and Backend Developer

Sep 2022 - Jun 2023

- Collaborated with multidisciplinary team in an Agile environment to develop website using HTML, CSS, and JavaScript that enhances user gameplay for supported multiplayer video games and tracks player progression
- Developed year-long prototype in GitLab using Python and game engine APIs to deliver real-time performance metrics based on user input

SKILLS AND CERTIFICATIONS

- Programming languages: Python, HTML, CSS, JavaScript
- Software and Tools: Active Directory, Linux/PowerShell, Hack The Box (CTF Challenges), Wireshark, Microsoft Excel (VLOOKUP, pivot tables, charts), Microsoft Office Suite, Figma

EXTRACURRICULAR

- **Drexel Gaming Association**, Social Media Lead – Promoted events and managed outreach as part of the marketing team
